Note: Unit of analysis is persons. N= 324,356,000. Income from social welfare programs includes cash income from TANF through federally-funded and state-separate programs, SSI income and the value of SNAP benefits. Excluded are cash benefits from other programs, such as state-local "general assistance" or solely-state-funded programs providing benefits to families who previously would have received TANF in some states. Total >50% includes all persons with more than 50 percent of their total annual income from these programs.

Note: Unit of analysis is persons. N= 324,356,000 in 2018 and N= 325,268,000 in 2019. Dependency is defined as living in a family having more than 50 percent of total annual income from one or more of these programs. Dependency rates would be lower if adjusted to exclude TANF assistance associated with work. Reciprocity is defined as living in a family with receipt in any amount for AFDC/TANF, SSI or SNAP during the year. Spouses are not present in categories shown for families headed by men and families headed by women. Beginning in 2002, persons who reported more than one race are not shown under either race category. Due to small sample size, Asians and Native Hawaiians or Other Pacific Islanders as well as American Indians and Alaska Natives but are not shown separately. Hispanic persons may be of any race.

Note: TANF includes small worker supplements which began in a few states following the Deficit Reduction Act of 2005 (DRA) and expanded in recent years to support low-income families transitioning to employment. Beginning in 2000, TANF data include separate state program (SSP) recipients. Adult and child recipients in 1998 were 1999 are estimated using data from the National Emergency TANF Data Files. Recipients are expressed as the fiscal year average of monthly caseloads from administrative data, excluding recipients in the territories. Tribal TANF recipients also are excluded. Child recipients include a small number of dependents ages 18 and older who are students.

Source: U.S. Department of Health and Human Services, Administration for Children and Families, Office of Family Assistance (www.acf.hhs.gov/ofa/resource/tanf-caseload-data-2018) Population denominators for the percentage of recipients in each category are from the U.S. Census Bureau.

Note: Estimates are fiscal year averages using monthly caseload data from administrative records. Data by age is not available until 1979. Percentages are calculated based on population estimates from the U.S. Census Bureau. Recipient totals exclude the territories. From 1975 to 1983 the number of participants includes the Family Food Assistance Program (FFAP) that was largely replaced by the Food Stamp Program in 1975. From 1975 to 1983 the number of FFAP participants averaged only 88 thousand.

Note: As programs have changed over time, reporting from HHS has changed for clarity. Prior editions of this book showed an estimate of all families eligible for any TANF cash assistance or small supplement. Beginning in 2017 the number participating excludes families eligible only for a supplemental benefit most typically valued at \$10 or \$20 a month. Most supplemental benefits are granted to families with children who receive SNAP but not TANF. Data on the full caseload can be obtained from the HHS Administration for Children and Families website at <<https://www.acf.hhs.gov/ofa/programs/tanf/data-reports>>.

TANF includes separate state programs (SSPs) funded with maintenance-of-effort dollars. However, cash welfare income from "general assistance" or solely-state-funded programs (SSFs) **do not** count as TANF. Units that receive only small "worker supplement" benefits are excluded beginning in 2017. TANF receipt in this tables **excludes** units in the U.S. territories, non-custodial parent units, pregnancy-only units, and units with no cash benefits.

Errata: For 2013 through 2016, a coding error increased self-employment income beyond the eligibility limit for a subset of individuals and had the effect of over-estimating participation rates. Previously published rates for 2013, 2014, 2015, and 2016 were inflated by a minimum of 0.1 percentage point to a maximum of 0.4 percentage points. The current table presents corrected, updated participation rates for these years.

Note: Improvements to the survey have resulted in small changes to the methodology over time. The model was revised in 1997 and 1998 to more accurately exclude ineligible immigrants. In 2004 the method for identifying individuals eligible for SSI due to disability were improved. Unpublished tabulations from the Social Security Administration based on data from the Survey of Income and Program Participation suggest that the rate of SSI participation among eligible working-age adults was between 40 percent and 80 percent.

Note: The percentage of individuals who received assistance from any one program in an average month (shown here) is lower than the percentage who received assistance at some point over the course of a year (shown in Table 1). Categories are mutually exclusive. AFDC/TANF and Food Stamps/SNAP receipt are based on the family or recipient unit while SSI receipt is based on individuals. The TRIM model did not accumulate individuals who received benefits from all three programs.

Note: Data is an average monthly percentage of the population. Categories are mutually exclusive. TANF and SNAP receipt are based on the family or recipient unit while SSI receipt is based on individuals. Individuals do not tend to receive both TANF and SSI; hence, no individual receives benefits from all three programs. The percentage of individuals receiving assistance from any one program in an average month (shown here) is lower than the percentage residing in families receiving assistance at some point over the course of a year shown in Table 2 Indicator 1. Persons who reported more than one race are not included the race categories above. Due to small sample sizes, American Indians/Alaska Natives, Asians and Native Hawaiians/Other Pacific Islanders are not shown separately. Hispanic persons may be of any race.

Note: Food secure households have consistent, dependable access to enough food for active, healthy living. Households with low food security had difficulty at some time during the year providing enough food for all their members due to a lack of resources. Households with very low food security experienced reduced food intake for some household members and the disruption of normal eating patterns due lack of money and other resources.
